1951

Amblecote Urban District Council.

Annual Report

OF THE

Medical Officer of Health

For the Year ending December 31st, 1950.

MR. CHAIRMAN AND GENTLEMEN,

I beg to submit to you the Annual Report for the year ending December 31st, 1950.

The Vital Statistics show a Crude Death Rate of 12.8 per 1000 of the population, as compared with 12.7 for 1949. The Live Birth Rate was 13.1 per 1000 of the population, as compared with 15.0 for 1949. There were 2 Still-births. The Infantile Mortality Rate was nil per 1000 live births.

An epidemic of Measles occurred in the latter months of the year. It was not severe and there were no deaths from the disease.

Housing and Overcrowding are dealt with in the Report of the Sanitary Inspector.

There has been no change in the Industrial Circumstances of your District since my last report.

GENERAL STATISTICS.

Area of District in Acres	-	-	-	665
Number of Persons per acre	-	-	-	4.5
Population (Registrar General's Estimate of Resident Population, middle of 1950)	-	-	-	3130

I am, Mr. Chairman and Gentlemen,

Your obedient servant,

J. H. SIMPKISS,

Medical Officer of Health.

Amblecote Urban District Council.

Annual Report OF THE Sanitary Inspector

For the Year 1950.

MR. CHAIRMAN AND GENTLEMEN,

I beg to submit to you in an abbreviated form my report for the Year 1950.

Sanitary Accommodation.

Houses provided with Water Closets	-	912	} 928
Houses provided with Pan Closets	-	4	
Houses provided with Earth Closets	-	12	
Houses provided with separate Water Closets		793	} 928
Houses provided with Water Closets in common		119	
Houses provided with Pan and Earth Closets		16	

The houses not provided with Water Closets are situate in an outlying part of your district which is extensively used for Fire Clay Mining. Sewer accommodation is not practicable.

Removal of Household Refuse and Salvage Collection.

912 Houses out of 928 are provided with Sanitary Dust Bins and Covers of Galvanised Iron. Refuse Removal is carried out by Direct Labour. Collection is bi-weekly. The weight of ashes removed has increased considerably due to the poor quality of fuel supplied to householders. Disposal is by tipping. The tip is used for purposes other than domestic refuse which is covered within a short time of tipping. It is so conveniently situated that a horse drawn vehicle is much more economical than one mechanically propelled.

The owners of 4 houses have provided new Dust Bins to replace those worn out. No objections have been made when Notices have been given. Despite recent decisions it has not been deemed necessary to consider the supply of Dust Bins by the Council.

The collection of Waste Paper was abandoned in 1949 owing to the difficulty of finding a market at a reasonable price. It has not been possible to resume operations owing to shortage of labour.

Housing.

The position has not improved during 1950. A Compulsory Purchase Order for the acquisition of land for houses was confirmed by the Minister of Health. Numerous difficulties have since arisen which have prevented the conveyance to the Council. A settlement, however, appears to be in sight. Plans for 48 Flats built in 3 storeys have received preliminary approval and it is hoped that they will be in course of erection in 1951. Owing to this delay no licences have been available for persons who wish to build houses for their own occupation. Applications for houses are in excess of the number to be erected. Future development, if any, will present considerable difficulties.

Housing Conditions.

The houses in your District may be classified as follows :—

Houses with one Bedroom	-	-	1	} 928
Houses with two Bedrooms	-	-	315	
Houses with three Bedrooms	-	-	526	
Houses with more than three Bedrooms			86	

One “unfit” house has been demolished, viz. :—No. 9 Stamford Road. Statutory Action was not necessary. The tenant was suitably re-housed.

The following houses have been dealt with by Statutory Notices under the Public Health Act, 1936, viz. :—Nos. 144, 145, 146, 124 King William Street, 36, Brettell Lane, and by Informal Notices Nos. 37 Brettell Lane, 64 King William Street, 12 and 15 High Street and 9 Stamford Road (demolished).

Repairs still present a problem owing to the high cost which may be quite disproportionate to the rent.

Abatement Notices.—informal and statutory—within the provisions of the Public Health Act, 1936—were served on the owners of 39 houses.

Overcrowding.—There is little actual overcrowding. The average number of persons per house remains at 3.3. Occupation of houses by 2 families, generally related, is common. The number of separate families is estimated to be about 1100.

Eradication of Bed Bugs, Etc.

No premises have been found to be infested and no complaint of infestation has been received.

Water Supply.

With one exception all premises receive a continuous and pure supply of water for drinking and domestic purposes from the Stourbridge and District Water Board. The principal Bore Holes (at Wollaston Road and Mill Meadow) are situated in your District. Samples of Water for Chemical and Bacteriological Examination are taken at frequent intervals. The Laboratories are provided by the County Council. The Reports indicate a certain Hardness but otherwise the Water is of excellent quality for drinking. Close co-operation is maintained with the Engineer to the Board.

Retailers of Milk. Milk & Dairies (Special Designation) Regulations 1949.

“Loose” milk is delivered by 4 retailers only, one from within the district and 3 from without. The bulk of the milk sold is “bottled” and is retailed as delivered by the wholesalers. It consists wholly of designated milk, viz. :—“Sterilised,” “Pasteurised” and “Tuberculin Tested.” “Secondary” Licences have been issued as follows :—2 each in respect of Sterilised, Pasteurised and Tuberculin Tested Milk. The Principal Licences were issued by the City of Birmingham and the County Borough of Wolverhampton. 11 Shopkeepers have been licensed to retail “Sterilised” Milk all of which is sold in bottles as delivered.

Food—Public Health (Meat) Regulations.

No Slaughter-house is used in this District. Three Retail Butchers are supplied with Meat from a Central Depot at Brierley Hill which is controlled by the Ministry of Food.

Inspections of live animals and carcasses are carried out there by qualified inspectors.

Food Distribution.

Food & Drugs Act 1938 Sec. 15.

Food is sold by retail in the following shops viz. :—

Butchers 3, Grocers 4, General 10 (part shops and part dwelling houses), Greengrocers etc. 6 (2 lock-up shops and four part shops and part dwelling houses), Sweets and Tobacco 2 (part shops and part dwelling houses), Fried Fish 3 (part shops and part dwelling houses), Cafes 1.

Food poisoning outbreaks—Nil.

The model Bye-Laws suggested by the Ministry of Food for securing the observance of sanitary and cleanly conditions and practices in the Handling, Wrapping and Delivery of Food sold or intended for sale for human consumption have been adopted. They were confirmed by the Minister of Food and came into operation on September 11th, 1950.

Ice Cream.

No Ice Cream is manufactured in your District. Licences for sale by retail have been issued as follows :—Shops 5, Cafe 1.

Prevention of Pests.

Disinfestation of the following premises has been undertaken viz. :—Factories 4, Pig Sties 1 and Refuse Tips 2. In the case of factories, regularly quarterly treatment is recommended. The work is carried out by an Operator employed by Brierley Hill Urban District Council by arrangement with Mr. H. J. Parker, Chief Sanitary Inspector whose assistance is appreciated. It has not been necessary to treat the sewers. Previous tests were “negative.”

Smoke Abatement and Atmospheric Pollution

Complaints have been made of the emission of smoke and fumes from one factory chimney. Experts have been consulted and recommended raising the stack.

I am, Mr. Chairman and Gentlemen,

Your obedient Servant,

HAROLD PIPER,

Sanitary Inspector.

August, 1951.
